LC Flex Angle Boot Patch Cords

The Lanview Bendable series is engineered for flexible cable management, able to bend and sustain any angle from a straight line to 90 degrees. The boot, shaped around a single stainless-steel wire, is easily adjustable by hand, while the internal wire maintains the set angle or direction.

The boot's design permits repositioning at any moment or straightening for the disconnection of connectors. Its versatility guarantees ideal connector positioning in demanding situations, like confined areas or environments with high density.

LC Flex Angle patch cable saves up to 50% in cabling space due to its flexible design, and it ensures easier maintenance and contributes to a better airflow
