

NOW IN STOCK!

Uniboot LC fibre patch cables Low Smoke Zero Halogen 3.0mm

Uniboot cables are suited for indoor usage in server rooms, data centres, LAN applications, cable TV networks, telephone lines, and other applications.

The cables come with a tool-less design with the possibility of reversible polarity and with colour identification. The Uniboot fibre patch cables come with a push-plug tap with a quicker latch release. This makes the connecting and disconnecting of one fibre patch cable easier and without affecting the other surrounding links.

The Uniboot LC fibre patch cables consist of Duplex LC connectors that are wrapped in a common jacket with one boot. It is a 2-fibre cable to achieve duplex data transmission.

LC Uniboot patch cable saves up to 50% in cabling space due to its compact design, and it ensures easier maintenance and contributes to a better airflow.
